

Create a Fortress of Trust

Embezzlement is seldom reported although someone on the team usually knows it's occurring. This corrupt act destroys the trust of your team, any bonus program you MAY have in place, and POSSIBLY the quality of care you provide your patients.

This is not a fun subject, however, without the knowledge and tools in place, it is almost guaranteed to strike most practices.

Let's take a team approach to why and how to protect you, your office AND the entire team from the wrongful actions of embezzlers.

This course will cover:

- Personality traits of fraudsters
- Understanding the importance of passwords
- Defining safeguards for the dentist and the team
- Discovering methods that promote teamwork
- Understanding the impact this has or can have on the practice
